VENDOR MANAGEMENT SOFTWARE

At Pienaar Bros, we have a unique vendor management software system called Metamorphosis. Developed in-house, it's a cutting-edge tool offering insight into a customer's usage and spend trends and is enhanced with a real-time reporting system and real-time business intelligence. It's linked to a network of suppliers and a just-in-time approach to stock maintenance. The software can be offered as part of a comprehensive proposal to manage sites and enhance cost-saving measures. Metamorphosis also assists with managing the customers Occupational Health and Safety program on an ongoing basis. Under a customised outsourcing model, we support see to aspects such as stock control, inventory data and delivery (amongst other things) with a view to taking a load off our customers' shoulders and streamlining processes wherever possible. Customisable to a client's needs, Metamorphosis is all about ensuring cost-savings whenever and wherever possible. Typically, these cost-savings are achieved through reducing manual loading and human error and controlled invoicing.

The Metamorphosis vendor management system brings together procurement, finance, safety and one's employees to ensure savings across the board. A product of Pienaar Bros, it's a tool that sets us apart. The usage of PPE per employee or department can be tracked in detail by the software ensuring control of the issuing of PPE for the onsite store to our customer.
